According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version	Revision Date:	SDS Number:	Date of last issue: 27.04.2022
2.11	23.09.2022	800001006652	Print Date 24.09.2022

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name	: Shell Gadus S2 V220 00
Product code	: 001D8449

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- stance/Mixture	: Automotive and industrial grease.
Uses advised against	: This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup- plier.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: Shell Polska Sp. z o.o. ul. Bitwy Warszawskiej 1920r. 7a PL-02-366 Warszawa
Telephone Telefax Contact for Safety Data Sheet	 : (+48) 22 570 0000 : (+48) 22 570 0001 : If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com
1.4 Emergency telephone nu	

: 0 800 080 014 (8:00-17:00) +48 601 233000 (beside office working hours 24/7 - Emergency phone line for Shell Polska)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms Signal word		No Hazard Symbol required No signal word
Hazard statements	:	PHYSICAL HAZARDS: Not classified as a physical hazard according to CLP criteria.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 2.11	Revision Date: 23.09.2022	SDS Num 80000100		Date of last issue: 27.04.2022 Print Date 24.09.2022
		CLP cr	ENVIRON Not classif	IAZARDS: ied as a health hazard under CLP criteria. MENTAL HAZARDS: ied as environmental hazard according to
Precau	itionary statements	: Prevei	ntion:	
			No precau	tionary phrases.
		Respo	nse:	
			No precau	tionary phrases.
		Storag	je:	
			No precau	tionary phrases.
		Dispo	sal:	
			No precau	tionary phrases.
Safety	data sheet available o	n request.		
Sensiti	sing components	: Conta	ins alkyl thi	adiazole.

Sensitising components	: Contains alkyl thiadiazole.
	Contains Bismuth Naphthenate.
	Contains naphthenic acid.
	Contains Zinc Naphthenate
	May produce an allergic reaction.

2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used grease may contain harmful impurities.

High-pressure injection under the skin may cause serious damage including local necrosis. Not classified as flammable but will burn.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Chemical nature	:	A lubricating grease containing highly-refined mineral oils and additives. The highly refined mineral oil contains <3% (w/w) DMSO- extract, according to IP346. Classification based on DMSO extract content < 3% (Regula- tion (EC) 1272/2008, Annex VI, Part 3, Note L).

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid mea	isures
Protection of first-aiders	: When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
If inhaled	: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
In case of skin contact	: Remove contaminated clothing. Flush exposed area with wa- ter and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
	When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait for symptoms to develop. Obtain medical attention even in the absence of apparent wounds.
In case of eye contact	 Flush eye with copious quantities of water. Remove contact lenses, if present and easy to do. Continue rinsing. If persistent irritation occurs, obtain medical attention.
If swallowed	: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 2.11	Revision Date: 23.09.2022	SDS Number: 800001006652	Date of last issue: 27.04.2022 Print Date 24.09.2022
4.2 Most i	mportant symptoms	and effects, both act	ute and delayed
Symptoms		: Oil acne/follicul of black pustule	itis signs and symptoms may include formation as and spots on the skin of exposed areas. result in nausea, vomiting and/or diarrhoea.
		Local necrosis is evidenced by delayed onset of pain and tissue damage a few hours following injection.	
4.3 Indica	tion of any immedia	te medical attention a	nd special treatment needed
Treat	ment	vention and por age and loss of Because entry ousness of the determine the e anaesthetics or can contribute surgical decom eign material sl	atically. njection injuries require prompt surgical inter- ssibly steroid therapy, to minimise tissue dam-

SECTION 5: Firefighting measures

5.1 Extinguishing media		
Suitable extinguishing media	:	Foam, water spray or fog. Dry chemical powder, carbon diox- ide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	:	Do not use water in a jet.
5.2 Special hazards arising from	h th	e substance or mixture
Specific hazards during fire- fighting	:	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.
5.3 Advice for firefighters		
Special protective equipment for firefighters	:	Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).
Specific extinguishing meth-	:	Use extinguishing measures that are appropriate to local cir-

ods		cumstances ar	nd the surrounding environment.
SECTIO	N 6: Accidental relea	ase measures	
6.1 Perso	nal precautions, prote	ective equipment an	d emergency procedures
Perso	onal precautions	Avoid contact v 6.1.2 For emer	emergency personnel: with skin and eyes. gency responders: with skin and eyes.
6.2 Enviro	onmental precautions		
Envir	onmental precautions	nation. Prevent	e containment to avoid environmental contami- t from spreading or entering drains, ditches or sand, earth, or other appropriate barriers.
6.3 Metho	ods and material for co	ontainment and clea	ning up
	ods for cleaning up		preading or entering into drains, ditches or riv-

Methods for cleaning up	:	Prevent from spreading or entering into drains, ditches or riv-
		ers by using sand, earth, or other appropriate barriers.

6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

SECTION 7: Handling and storage

7.1 Precautions for safe handling Technical measures :	Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk as- sessment of local circumstances to help determine appropri- ate controls for safe handling, storage and disposal of this material.
Advice on safe handling :	Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning mate- rials in order to prevent fires.

7.2 Conditions for safe storage, including any incompatibilities

Further information on stor-	:	Keep container tightly closed and in a cool, well-ventilated
age stability		place.
		Use properly labeled and closable containers.
		Store at ambient temperature.

Refer to section 15 for any additional specific legislation cov-

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 2.11	Revision Date: 23.09.2022	SDS Number: 800001006652	Date of last issue: 27.04.2022 Print Date 24.09.2022
Packa	nging material	: Suitable mate	kaging and storage of this product. erial: For containers or container linings, use mild density polyethylene. aterial: PVC.
Conta	iner Advice		containers should not be exposed to high tem- cause of possible risk of distortion.
-	ic end use(s) fic use(s)	: Not applicabl	e

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral	Not As- signed	TWA (aerosol)	5 mg/m3 (cyclic aerosols)	PL OEL
Oil mist, mineral		TWA (inhalable fraction)	5 mg/m3	US. ACGIH Threshold Limit Values

Biological occupational exposure limits

No biological limit allocated.

8.2 Exposure controls

Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version	Revision Date:	SDS Number:	Date of last issue: 27.04.2022
2.11	23.09.2022	800001006652	Print Date 24.09.2022

Due to the product's semi-solid consistency, generation of mists and dusts is unlikely to occur.

Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection	:	If material is handled such that it could be splashed into eyes, protective eyewear is recommended. Approved to EU Standard EN166.	
Hand protection			
Remarks	:	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break-through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.	
Skin and body protection	:	Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.	
Respiratory protection	:	No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precau- tions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentra- tions to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the spe- cific conditions of use and meeting relevant legislation.

SECTION 10: Stability and reactivity

10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

10.2 Chemical stability

Stable.

No hazardous reaction is expected when handled and stored according to provisions

10.3 Possibility of hazardous reactions

Hazardous reactions : Reacts with strong oxidising agents.

10.4 Conditions to avoid

Conditions to avoid : Extremes of temperature and direct sunlight.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version	Revision Date:	SDS Number:	Date of last issue: 27.04.2022

10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.

10.6 Hazardous decomposition products

No decomposition if stored and applied as directed.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Information on likely routes of	:	Skin and eye contact are the primary routes of exposure alt-
exposure		hough exposure may occur following accidental ingestion.

Acute	toxicity
Acute	UNICITY

Acute oral toxicity	:	LD50 (rat): > 5.000 mg/kg Remarks: Low toxicity: Based on available data, the classification criteria are not met.
Acute inhalation toxicity	:	Remarks: Based on available data, the classification criteria are not met.
Acute dermal toxicity	:	LD50 (Rabbit): > 5.000 mg/kg Remarks: Low toxicity: Based on available data, the classification criteria are not met.
Skin corrosion/irritation		
Product:		
Remarks	:	Slightly irritating to skin. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Based on available data, the classification criteria are not met.
Serious eye damage/eye irri	tati	on
Product:		

Remarks	:	Slightly irritating to the eye.
		Based on available data, the classification criteria are not met.

12.7 Other adverse effects

Product: Additional ecological infor- : mation	Does not have ozone depletion potential, photochemical ozone crea- tion potential or global warming potential. Product is a mixture of non-volatile components, which will not be released to air in any significant quantities under normal conditions of use.
	Poorly soluble mixture. Causes physical fouling of aquatic organisms.
	Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).
	Mineral oil does not cause chronic toxicity to aquatic organisms at concentrations less than 1 mg/l.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product	 Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Do not dispose into the environment, in drains or in water courses Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination. Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.
	MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.
Contaminated packaging	Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.
Local legislation

Remai	rks	:	for special precau	ons: Refer to Section 7, Handling & Storage, utions which a user needs to be aware of or with in connection with transport.

14.7 Maritime transport in bulk according to IMO instruments

MARPOL Annex 1 rules apply for bulk shipments by sea.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

REACH - List of substances subject to authorisation (Annex XIV) : Product is not subject to Authorisation under REACH.

Volatile organic compounds : Volatile organic compounds (VOC) content: 0 %

Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Act of 25 February 2011 on chemical substances and their mixtures (Dz.U. 2011 nr 63 poz. 322).

Ordinance of the Minister of Health of 12 January 2015 concerning the criteria and procedures for classification of chemical substances and their mixtures (Dz.U. 2015 poz. 208).

Regulation of the Minister of Labor and Social Policy of 6th June 2014 concerning the highest allowable concentrations and levels of agents harmful for health in the workplace (Dz.U. 2018 poz. 1286).

Regulations of the Minister of Economy, Labor and Social Policy of 21 December 2005 concerning the basic requirements for personal protective equipment (Dz.U. 2005 nr 259 poz. 2173).

Ordinance of the Minister of Health of 9 September 2016 on the health and safety of workers related to chemical agents at work (Dz.U. 2016 poz. 1488).

Regulation of the Minister of Health of 2nd February 2011 concerning tests and measurement of agents harmful for health in the workplace (Dz.U. 2011 nr 33 poz 166).

Regulation of the Minister of Health of 20 April 2012 on the labelling of packaging of dangerous substances and mixtures of dangerous substances and mixtures (Dz.U. 2011 nr 33 poz. 166). Act of 14 December 2012 on Waste (Dz.U. 2013 poz. 21).

Act of 13 June 2013 on packaging and packaging waste (Dz.U. 2013 poz. 888).

Regulation of the Minister of Environment of 9 December 2014 on the Waste Catalog (Dz.U. 2014 poz. 1923).

2.11	23.09.2022	800001006652	Print Date 24.09.2022

Act of 19 August 2011 on the carriage of dangerous goods (Dz.U. 2011 nr 227 poz. 1367).

The components of this product are reported in the following inventories:REACH: Not established.

TSCA : All components listed.

15.2 Chemical safety assessment

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

SECTION 16: Other information

Full text of H-Statements

H315 :	Causes skin irritation.
H317 :	May cause an allergic skin reaction.
H319 :	Causes serious eye irritation.
H332 :	Harmful if inhaled.
H411 :	Toxic to aquatic life with long lasting effects.
H413 :	May cause long lasting harmful effects to aquatic life.

Full text of other abbreviations

Acute Tox.	:	Acute toxicity
Aquatic Chronic	:	Long-term (chronic) aquatic hazard
Eye Irrit.	:	Eye irritation
Skin Irrit.	:	Skin irritation
Skin Sens.	:	Skin sensitisation

Further information

Other information	:	No Exposure Scenario annex is attached to this safety data sheet. It is a non-classified mixture containing hazardous sub- stances as detailed in Section 3; relevant information from Exposure Scenarios for the hazardous substances contained have been integrated into the core sections 1-16 of this SDS.
		A vertical bar () in the left margin indicates an amendment from the previous version.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
